The revival of madrasas in the 1980s coincided with the rise of political Islam and soon became associated with the "clash of civilizations" between Islam and the West. This volume examines the rapid expansion of madrasas across Asia and the Middle East and analyses their role in society within their local, national and global context. Based on anthropological investigations in Afghanistan, Bangladesh, China, Iran, and Pakistan, the chapters take a new approach to the issue, examining the recent phenomenon of women in madrasas; Hui Muslims in China; relations between the Iran's Shia seminary after the 1979-Islamic revolution and Shia in Pakistan and Afghanistan; and South Asian madrasas. Emphasis is placed on the increased presence of women in these institutions, and the reciprocal interactions between secular and religious schools in those countries. Taking into account social, political and demographic changes within the region, the authors show how madrasas have been successful in responding to the educational demand of the people and how they have been modernized their style to cope with a changing environment. A timely contribution to a subject with great international appeal, this book will be of great interest to students and scholars of international politics, political Islam, Middle East and Asian studies and anthropology.

Gendered Morality

In this introduction to the Qur'an, Fazlur Rahman unravels its complexities on themes such as God, society, revelation, and prophecy.

The Great Theft

In Islamic life and tradition, Hadith sayings enshrine the most important teachings after the Qur'an itself. Derived from the Sunnah or teachings of the Prophet and his Companions and their followers, these precepts were collected under the title Al-Adab al-mufrad-meaning 'Good behaviour singled out'-by Imam al-Bukhari in the ninth century CE. The Hadith sayings in al-Bukhari's writings formed a large corpus that covered the way Muslims should conduct their lives, from duties to parents, family, relatives, neighbors and friends, to instruction about honesty, generosity, truthfulness and kindness. While al-Bukhari's original text runs to many hundreds of pages forming several volumes, Abdul Hamid has made a selection of the teachings that has relevance and appeal to today's readership, with appeal not only to Muslims but to all who seek to know more of the essence of Islamic life and teachings.

The Impossible State

This book aims to explore and analyse Islamic Moral Economy (IME) as an alternative economic and social system to capitalism and socialism. It proposes a new model of Islamic development, integrating global development within an Islamic framework of spiritual development. It is argued that the failure of Muslim countries to provide basic necessities and an environment free of oppression and injustice can be overcome with this authentic Islamic development framework. In addition, this book can be an important study to identify the theological, political, social and economic boundaries for changing the society to produce IME oriented developmentalism.

Al-Ghazālī and the Idea of Moral Beauty rethinks the relationship between the good and the beautiful by considering the work of eleventh-century Muslim theologian Abū ʿAbd al-Ghazālī (d. 1111). A giant of Islamic intellectual history, al-Ghazālī is celebrated for his achievements in a wide range of disciplines. One of his greatest intellectual contributions lies in the sphere of ethics, where he presided over an ambitious attempt to integrate philosophical and scriptural ideas into a seamless ethical vision. The connection between ethics and aesthetics turns out to be a signature feature of this account. Virtue is one of the forms of beauty, and human beings are naturally disposed to respond to it with love. The universal human response to beauty in turn provides the central paradigm for thinking about the love commanded by God. While al-Ghazālī’s account of divine love has received ample attention, his special way of drawing the good into relation with the beautiful has oddly escaped remark. In this book Sophia Vasalou addresses this gap by offering a philosophical and contextual study of this aspect of al-Ghazālī’s ethics and of the conception of moral beauty that emerges from it. This book will be of interest to scholars and students in Islamic ethics, Islamic intellectual history, and the history of ethics.

Suspicions about the integration of Islam into European cultures have been steadily on the rise, and dramatically so since 9/11. One reason lies in the visibility of anti-Western Islamic discourses of salafi origin, which have monopolized the debate on the "true" Islam, not only among Muslims but also in the eyes of the general population across Europe; these discourses combined with Islamophobic discourses reinforce the so-called incompatibility between the West and Islam. This book breaks away from this clash between Islam and the West, by arguing that European Islam is possible. It analyzes the contribution that European Islam has made to the formation of an innovative Islamic theology that is deeply ethicist and modern, and it clarifies how this constructed European Islamic theology is able to contribute to the various debates that are related to secular-liberal democracies of Western Europe. Part I introduces four major projects that defend the idea of European Islam from different disciplines and perspectives: politics, political theology, jurisprudence and philosophy. Part II uses the frameworks from three major philosophers and scholars to approach the idea of European Islam in the context of secular-liberal societies: British scholar George Hourani, Moroccan philosopher Taha Abderrahmane and the American philosopher John Rawls. The book shows that the ongoing efforts of European Muslim thinkers to revisit the concept of citizenship and political community can be seen as a new kind of political theology, in opposition to radical forms of Islamic thinking in some Muslim-majority countries. Opening a new path for examining Islamic thought "in and of" Europe, this book will appeal to students and scholars of Islamic Studies, Islam in the West and Political Theology.

In Gendered Morality, Zahra Ayubi rethinks the tradition of Islamic philosophical ethics from a feminist critical
perspective. She calls for a philosophical turn in the study of gender in Islam based on resources for gender equality that are unlocked by feminist engagement with the Islamic ethical tradition.

**Islam and Morality**

Perhaps no other Western writer has more deeply probed the bitter struggle in the Muslim world between the forces of religion and law and those of violence and lawlessness as Noah Feldman. His scholarship has defined the stakes in the Middle East today. Now, in this incisive book, Feldman tells the story behind the increasingly popular call for the establishment of the shari'a—the law of the traditional Islamic state—in the modern Muslim world. Western powers call it a threat to democracy. Islamist movements are winning elections on it. Terrorists use it to justify their crimes. What, then, is the shari'a? Given the severity of some of its provisions, why is it popular among Muslims? Can the Islamic state succeed—should it? Feldman reveals how the classical Islamic constitution governed through and was legitimated by law. He shows how executive power was balanced by the scholars who interpreted and administered the shari'a, and how this balance of power was finally destroyed by the tragically incomplete reforms of the modern era. The result has been the unchecked executive dominance that now distorts politics in so many Muslim states. Feldman argues that a modern Islamic state could provide political and legal justice to today's Muslims, but only if new institutions emerge that restore this constitutional balance of power. The Fall and Rise of the Islamic State gives us the sweeping history of the traditional Islamic constitution—its noble beginnings, its downfall, and the renewed promise it could hold for Muslims and Westerners alike. In a new introduction, Feldman discusses developments in Egypt, Tunisia, Libya, and other Muslim-majority countries since the Arab Spring and describes how Islamists must meet the challenge of balance if the new Islamic states are to succeed.

**Islamic Ethics of Life**

The Uzbekistan government has been criticized for its brutal suppression of its Muslim population. This 2011 book, which is based on the author's intimate acquaintance with the region and several years of ethnographic research, is about how Muslims in this part of the world negotiate their religious practices despite the restraints of a stifling authoritarian regime. Fascinatingly, the book also shows how the restrictive atmosphere has actually helped shape the moral context of people's lives, and how understandings of what it means to be a Muslim emerge creatively out of lived experience.

**Morality and Justice in Islamic Economics and Finance**

In 1948, the General Assembly of the United Nations adopted and proclaimed the International Declaration of Human Rights, a document designed to hold both individuals and nations accountable for their treatment of fellow human beings, regardless of religious or cultural affiliations. Since then, the compatibility of Islam and human rights has emerged as a particularly thorny issue of international concern, and has been addressed by Muslim rulers, conservatives, and extremists, as well as Western analysts and policymakers; all have commonly agreed that Islamic theology and human rights cannot coexist. Abdulaziz Sachedina rejects this informal consensus, arguing instead for the essential compatibility of Islam and human rights. He offers a balanced and incisive critique of Western experts who have ignored or underplayed the importance of religion to the development of human rights, contending that any theory of universal rights necessarily emerges out of particular cultural contexts. At the same time, he re-examines the juridical and theological traditions that form the basis of conservative Muslim objections to human rights, arguing that Islam, like any culture, is open to development and change. Finally, and most importantly, Sachedina articulates a fresh position that argues for a correspondence between Islam and secular notions of human rights.

**Moral System of Islam**

Islamic Ethics of Life considers three of the most contentious ethical issues of our time—abortion, war, and euthanasia—from the Muslim perspective. Distinguished scholars of Islamic studies have collaborated to produce a volume that both integrates Muslim thinking into the field of applied ethics and introduces readers to an aspect of the religion long overlooked in the West. This collective effort sets forth the relationship between Islamic ethics and law, clearly revealing the complexity and richness of the Islamic tradition as well as its responsiveness to these controversial modern issues. The contributors analyze classical sources and survey the modern ethical landscape to identify guiding principles within Islamic ethical thought. Clarifying the importance of pragmatism in Islamic decision making, the contributors also offer case studies related to specialized topics, including "wrongful birth" claims, terrorist attacks, and brain death. The case studies elicit possible variations on common Muslim perspectives. The contributors situate Muslim ethics relative to Christian and secular accounts of the value of human life, exposing surprising similarities and differences. In an introductory overview of the volume, Jonathan E. Brockopp underscores the steady focus on God as the one who determines the value of human life, and hence as the final arbiter of Islamic ethics. A foreword by Gene Outka places the volume in the context of general ethical studies, and an afterword by A. Kevin Reinhart suggests some significant ramifications for comparative religious ethics.

**The Fall and Rise of the Islamic State**

This book discusses the common principles of morality and ethics derived from divinely endowed intuitive reason through the creation of al-fitr’a (nature) and human intellect (al-’aql). Biomedical topics are presented and ethical issues related to topics such as genetic testing, assisted reproduction and organ transplantation are discussed. Whereas these natural sources are God’s special gifts to human beings, God’s revelation as given to the prophets is the supernatural source of divine guidance through which human communities have been guided at all times through history. The second part of the book concentrates on the objectives of Islamic religious practice – the maqa’ sid – which include: Preservation of Faith, Preservation of Life, Preservation of Mind (intellect and reason), Preservation of Progeny (al-nasl) and Preservation of Property. Lastly, the third part of the book discusses selected topical issues, including abortion, assisted reproduction devices, genetics, organ transplantation, brain death and end-of-life aspects. For each topic, the current medical evidence is followed by a detailed discussion of the ethical issues involved.

**Islamic Business Ethics**

Despite President George W. Bush's assurances that Islam is a peaceful religion and that all good Muslims hunger for democracy, confusion persists and far too many Westerners remain convinced that Muslims and terrorists are synonymous. In the aftermath of the attacks of 9/11, the subsequent wars in Afghanistan and Iraq, and the recent bombings in London, an unprecedented amount of attention has been directed toward Islam and the Muslim world. Yet, even with this increased scrutiny, most of the public discourse regarding Islam revolves around the actions of extremist factions such as the Wahhabis and al-Qa’ida. But what of the Islam we don't hear about? As the second-largest and fastest-growing religion in the world, Islam is deemed by more than a billion Muslims to be a source of serenity and spiritual peace, and a touchstone for moral and ethical guidance. While extremists have an impact upon the religion that is wildly disproportionate to their numbers, moderates constitute the majority of Muslims worldwide. It is this rift between the quiet voice of the moderates and the deafening statements of the extremists that threatens the future of the faith. In The Great Theft, Khaled Abou El Fadl, one of the world’s preeminent Islamic scholars, argues that Islam is currently passing through a transformative period no less dramatic than the movements that swept through Europe during the Reformation. At this critical juncture there are two completely opposed worldviews within Islam competing to define this great world religion. The stakes have never been higher, and the future of the Muslim world hangs in the balance. Drawing on the rich
tradition of Islamic history and law, The Great Theft is an impassioned defense of Islam against the encroaching power of the extremists. As an accomplished Islamic jurist, Abou El Fadl roots his arguments in long-standing historical legal debates and delineates point by point the beliefs and practices of moderate Muslims, distinguishing these tenets from the corrupting influences of the extremists. From the role of women in Islam to the nature of jihad, from democracy and human rights to terrorism and warfare, Abou El Fadl builds a vital vision for a moderate Islam. At long last, the great majority of Muslims who oppose extremism have a desperately needed voice to help reclaim Islam's great moral tradition.

Islam and Biomedical Research Ethics

This excellent book is translated from the original Arabic book 'Nidham ul Islam' by Sheikh Taqiuddin An Nabahani, an Islamic jurist, 'alim, writer and the founder of Hizb ut-Tahrir - the largest Islamic global political party under a single leadership. It lays out the fundamentals to develop a strong Islamic personality and da'wah carrier. It begins with laying the foundation by explaining the correct way to belief. It proves the existence of a creator intellectually and the Quran as the final revelation sent to humanity by Allah (swt). It then goes on to clarify the important creedal concept of Al-Qada wal Qadar (fate and destiny), which is often held in a vague or confused manner. The third chapter, its largest concentrates on explaining the different ideologies that exists namely Capitalism, Communism and Islam highlighting the differences between them giving the reader a clear framework to understand the world that we live in. After having laid the basis for the correct belief, intellectual and political thinking, it then moves onto address the key Islamic legal principles. The short chapters are intended to focus on the most important aspects such as Usuli subjects like the meaning of Hukm Shar'i, the types of ahkam shariah, Sunnah and emulating (ta'assi) the actions of the Messenger (saw). The last section of the book also clarifies misconceptions regarding spirituality and morals according to Islam as well as articulating the need for a constitution for the future Islamic state.

The System of Islam (Nidham Al Islam)

Islam, Memory, and Morality in Yemen tells a story of a Yemeni hereditary elite which was overthrown in the 1962 revolution in North Yemen. For over a millennium, they had enjoyed exclusive rights to the leadership of the Imamate, the religiously sanctioned state. Following the violent removal from power of King Faysal of Iraq in 1958, the overthrow of the Yemeni Imamate - the longest lasting Hashimite rule in the Middle East - confirmed the decline of Hashimites power (held by ruling generations claiming descent from the Prophet Muhammad). However, rather than concentrating on recent political history, Islam, Memory, and Morality in Yemen highlights the personal predicament of those targeted by the revolution, in which they served as the foil for the new regime's moral and political ascendancy. Focusing on the cultural politics of memory, the book explores how members of the elite remember in the process of making sense of their current lives and formulating responses to adversity.

The present issue includes several "lost" pages not included in the essay that was read out at Lahore. It deals with the following five broad themes, set by the moderators of the Conference: 1. The physical, moral and spiritual states of man 2. The state of man after death 3. The object of man's life and the means to its attainment 4. The operation of the practical ordinances of the Law in this life and the next 5. Sources of Divine knowledge."--Publisher's description.

Islam and the Challenge of Human Rights

Islam and Morality considers how Islam, the Qur'an, and other Islamic texts have approached the ethics of a variety of contemporary and historical issues. Oliver Leaman provides a varied, balanced, and thought-provoking account of how Islamic thinkers discussed medical ethics, wealth, poverty, the environment, and law. He explores the work of a range of Islamic thinkers, including Rumi, Ibn al-'Arabi, al-Ghazali, Mutahhari and Barlas, while taking into consideration the different branches of Islam and Islamic theology and law. The book also considers how Islam understands the concept of free will, the relationship between good and evil, and far less abstract
topics like what we should eat and drink. Aimed at upper level undergraduates, postgraduates, and researchers working in Islamic Studies and ethics, this is one of the first books to provide a sustained reading of the importance of ethics within Islam.

The Idea of European Islam

Moral Rationalism and Shi‘i ‘a is the first attempt at outlining the scope for a theological reading of Shi‘a, based on a critical examination of why ‘Adliyya theological ethics have not significantly impacted Shi‘i readings of Shi‘a. Within Shi‘i works of Shi‘a legal theory (usūl al-fiqh) there is a theoretical space for reason as an independent source of normativity alongside the Qur‘an and the Prophetic tradition. The position holds that humans are capable of understanding moral values independently of revelation. Describing themselves as ‘Adliyya (literally the people of Justice), this allows the Shi‘a, who describe themselves as ‘Adliyya (literally, the People of Justice), to attribute a substantive rational conception of justice to God, both in terms of His actions and His regulative instructions. Despite the Shi‘i adoption of this moral rationalism, independent judgments of rational morality play little or no role in the actual inference of Shi‘a norms within mainstream contemporary Shi‘i thought. Through a close examination of the notion of independent rationality as a source in modern Shi‘i usūl al-fiqh, the obstacles preventing this moral rationalism from impacting the understanding of Shi‘a are shown to be purely epistemic. In line with the ‘emic’ (insider) approach adopted, these epistemic obstacles are revisited identifying the scope for allowing a reading of Shi‘a that is consistent with the fundamental moral rationalism of Shi‘i thought. It is argued that judgments of rational morality, even when not definitively certain, cannot be ignored in the face of the apparent meaning of texts that are themselves also not certain. An ‘Adliyya reading of Shi‘a demands that the strength of independent rational evidence be reconciled against the strength of any other apparently conflicting evidence, such that independent judgments of rational morality act as a condition for the validity of precepts attributed to a just and moral God.

The Making of Islamic Economic Thought

How do modern Muslims adapt their traditions to engage with today's world? Charles Tripp's erudite and incisive book considers one of the most significant challenges faced by Muslims over the last sixty years: the challenge of capitalism. By reference to the works of noted Muslim scholars, the author shows how, faced by this challenge, these intellectuals devised a range of strategies which have enabled Muslims to remain true to their faith, whilst engaging effectively with a world not of their own making. The work is framed around the development of their ideas on Islamic socialism, economics and the rationale for Islamic banking. While some Muslims have resorted to confrontation or insularity to cope with the challenges of modernity, most have aspired to innovation and ingenuity in the search for compromise and interaction with global capitalism in the twenty-first century.

Islam in Post-Soviet Uzbekistan

Wael B. Hallaq boldly argues that the "Islamic state," judged by any standard definition of what the modern state represents, is both impossible and inherently self-contradictory. Comparing the legal, political, moral, and constitutional histories of premodern Islam and Euro-America, he finds the adoption and practice of the modern state to be highly problematic for modern Muslims. He also critiques more expansively modernity’s moral predicament, which renders impossible any project resting solely on ethical foundations. The modern state not only suffers from serious legal, political, and constitutional issues, Hallaq argues, but also, by its very nature, fashions a subject inconsistent with what it means to be, or to live as, a Muslim. By Islamic standards, the state’s technologies of the self are severely lacking in moral substance, and today’s Islamic state, as Hallaq shows, has done little to advance an acceptable form of genuine Shari’a governance. The Islamists' constitutional battles in
Egypt and Pakistan, the Islamic legal and political failures of the Iranian Revolution, and similar disappointments underscore this fact. Nevertheless, the state remains the favored template of the Islamists and the ulama (Muslim clergymen). Providing Muslims with a path toward realizing the good life, Hallaq turns to the rich moral resources of Islamic history. Along the way, he proves political and other "crises of Islam" are not unique to the Islamic world nor to the Muslim religion. These crises are integral to the modern condition of both East and West, and by acknowledging these parallels, Muslims can engage more productively with their Western counterparts.

### The Qur'an with Annotated Interpretation in Modern English

### The Islamic Moral System Commentary of Surah Al Hujurat

This book is a contribution to the nascent discourse on global health and biomedical research ethics involving Muslim populations and Islamic contexts. It presents a rich sociological account about the ways in which debates and questions involving Islam within the biomedical research context are negotiated - a perspective which is currently lacking within the broader bioethics literature. The book tackles some key understudied areas including: role of faith in moral deliberations within biomedical research ethics, the moral anxiety and frustration experienced by researchers when having to negotiate multiple moral sources and how the marginalisation of women, the prejudice and abuse faced by groups such as sex workers and those from the LGBT community are encountered and negotiated in such contexts. The volume provides a valuable resource for researchers and scholars in this area by providing a systematic review of ethical guidelines and a rich case-based account of the ethical issues emerging in biomedical research in contexts where Islam and the religious moral commitments of Muslims are pertinent. The book will be essential for those conducting research in low and middle income countries that have significant Muslim populations and for those in Muslim-minority settings. It will also appeal to researchers and scholars in religious studies, social sciences, philosophy, anthropology and theology, as well as the fields of biomedical ethics, Islamic ethics and global health.

### Ethical Viewpoint of Islam

The How to Live as a Muslim series is an essential guide for anyone who seeks to acquire an accurate knowledge of Islam, as it elucidates all the facets of Islam with precise brevity in three volumes: An Introduction to Islamic Faith and Thought, Living in the Shade of Islam, and Living the Ethics and Morality of Islam. This book covers in detail the other four pillars of Islam: the establishment of the five daily prayers, the prescribed purifying alms, observing the fast of Ramadan, and the pilgrimage to Makka. The volume also examines cleanliness, the issues of marriage and family life, the lawful, and the unlawful.

### Islam and the Moral Economy

In the West, we tend to think of Islamic law as an arcane and rigid legal system, bound by formulaic texts yet suffused by unfettered discretion. While judges may indeed refer to passages in the classical texts or have recourse to their own orientations, images of binding doctrine and unbounded choice do not reflect the full reality of the Islamic law in its everyday practice. Whether in the Arabic-speaking world, the Muslim portions of South and Southeast Asia, or the countries to which many Muslims have migrated, Islamic law works is readily misunderstood if the local cultures in which it is embedded are not taken into account. With Islam and the Rule of Justice, Lawrence Rosen analyzes a number of these misperceptions. Drawing on specific cases, he explores the application of Islamic law to the treatment of women (who win most of their cases), the relations between Muslims and Jews (which frequently involve close personal and financial ties), and the structure of widespread corruption (which played a key role in prompting the Arab Spring). From these case study the role of informal mechanisms in the resolution of local disputes. The author also provides a close reading of the trial of Zacarias Moussaoui,
who was charged in an American court with helping to carry out the 9/11 attacks, using insights into how Islamic justice works to explain the defendant’s actions during the trial. The book closes with an examination of how Islamic cultural concepts may come to bear on the constitutional structure and legal reforms many Muslim countries have been undertaking.
